Trauma-Informed Care

Upcoming

Morning Process Group

9:00 AM · Group Room A · Sarah Jenkins, LCPC

Topic: Coping Skills & Triggers Type: Process Group

Program: Residential Attendance: 9/10 (90%)

SESSION OBJECTIVES

- Identify personal triggers from the past week
- Share one coping skill that worked
- Peer support and accountability check-in

GROUP NOTE

Group was engaged and cohesive today. Marcus W. shared significant trigger around work stress and received strong peer support. Samantha C. disclosed

Edit

Group therapy session documentation. Write one facilitation note, then generate individualised participation notes for each attending patient in one workflow — with attendance tracking and curriculum mapping.

Sunrise AI

Clinical AI Copilot — Human-in-the-Loop required for all outputs

HITL Enforced

Human-in-the-Loop (HITL) Policy

All AI-generated content in Sunrise OS requires explicit review and approval by a licensed clinician before it can be used, saved to any patient record, or shared. No AI output is automatically applied. Every approval is timestamped and logged for audit. This system is a *decision-support tool only* — clinical judgment always takes precedence.

Draft Note

Risk Summary

Treatment Plan

Clinical Q&A

Review Queue

AI Progress Note Drafter

Generate a structured SOAP note from patient data. A clinician must review and approve before saving to the chart.

HITL Policy: All AI output must be reviewed and approved by a licensed clinician before use.

Sunrise AI hub: AI-assisted progress note drafting (SOAP/BIRP/DAP/GIRP), risk stratification summaries, treatment plan goal generation, clinical Q&A, and a review queue — all under Human-in-the-Loop policy.
